

# Digital Signage

1

Single, robust, web-based CMS works across entire platform

2

Powerful Content Control: Who controls - What, Where, When and How content plays

3

Robust Backend System: Manage Players, Users, Screens and platform admin

4

Enterprise Class: Security, SSO, supportability, redundancy, scalability

5

Broad Integration: Genesys, Enterprise video, Office systems, Database, Web token-based apps, + + +

## Digital Media on Display

The Display5 Platform can deliver multiple digital signage and ipTV use cases with a single CMS and robust back-end. Providing customers with greater control, ease of management within a single infrastructure; increased flexibility for deployment; simplified compliance and support; and reduced operational and licensing costs.

Display5 is a versatile web-based digital signage platform which is tightly integrated with Genesys' PureConnect and PureCloud solutions, allowing Genesys stats to easily display on wallboards, digital signs, video walls and room panels across an organization. Display5 supports a wide range of player technologies including Win, Android, Linux, webOS based hardware and System on Chip (SoC) TV based players.
